How does a
Perfect week of a
QMIS KG kid look like?

Kindergarten education in our country has over the years gone through several trends, demands, and developments. From 3-year-olds being watched over by family/grandparents to being dropped by the grandparents to be 'kept' in a digitalised daycare center.

Well the one thing that remains unchanged over all these years, is the undiminishing potential of the kids.

So, it is only right that a KG education, beyond just 'engaging' must also nourish and encourage the innate capabilities of a child. And, the right foundation for this is laid during the child's KG years in a stimulative environment.

QMIS has always proven to **educate beyond books & classrooms.** The school takes it a notch higher when it comes to pampering and grooming their tiny tots.

Kid's Gym

Benefits

A well-planned safe environment for tiny tots to explore fun & fitness

Frequency

Anytime & anyday
